

Environmental policy

At Norsk Sveiseteknikk AS (NST), the environment and sustainability are of great importance, and we always strive to conduct our business in an environmentally responsible and sustainable manner. We recognize our responsibility to reduce the environmental impact of our activities and are committed to continuously improving our environmental performance

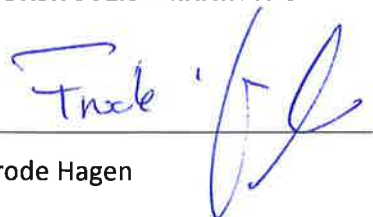

To achieve this, we commit to the following:

- **Comply with applicable environmental laws and regulations**, including requirements related to emissions, waste management, use of chemicals, and energy.
- **Prevent pollution** by reducing waste, emissions to air, water, and soil, and by minimizing the use of substances that are harmful to health and the environment.
- **Use resources efficiently**, including through reduced energy consumption, optimized logistics, and increased focus on reuse and recycling.
- **Choose environmentally friendly solutions** where this is practical and economically feasible, both in the procurement of goods, equipment, and services.
- **Set requirements for suppliers and business partners** with regard to environmental performance and compliance with relevant environmental standards.
- **Increase employee awareness** through training and involvement, ensuring that everyone actively contributes to achieving our environmental objectives.
- **Continuously improve our environmental efforts** by setting goals, monitoring results, and regularly evaluating measures.

This policy applies to the entire NST group. It is based on NST's core values and business ethics guidelines and is part of our management systems.
